

## Nexus AVDA8 8 way Distribution Amplifier

Distribute DVD/DTV to multiple display devices

Distribute Component Video, Analogue Audio and Composite Video or Digital Audio to 8 devices. Can be expanded with more AVDA8 Amplifiers.

This zero gain signal buffer/amplifier faithfully reproduces it's input at all 8 outputs. Ensuring all display devices connected to it receive the highest quality signal.

The AVDA8's versatility as an integrated part of the Nexus range is unparalleled. As a stand alone unit, it can distribute DVD or Digital TV signals to 9 Display Devices, when utilising the EXPANSION output for the last device. Team it with more AVDA8 Amplifiers to supply many more Display Devices. Add to it a Nexus switching system, and you'll be able to switch between a wide range of sources - DVD, DTV, Media PC, Media Player etc.
