

Control Options

SG1 Rotary Controller

Ideal for selecting individual products or packaged systems.

AV LINK

The AV2 remote control combined with the AVM1 mimic display allows your sales staff the luxury of never needing to leave their customers side during a demonstration

GP8 CONTROL PANEL

The control panel is the ideal control system for a busy store with several sales staff. "Customer" mode restricts certain functions to allow safe interactive operation by anyone.

SI6 Interactive controller

This controller is designed specifically for customer use. It is ideal for larger stores that want to allow customers total freedom to interact with their products. Try before you buy.

NEXUS TOUCH SCREEN

This is the ultimate in control options!! The screen will display everything from product specifications to pricing, with different levels of operation for sales staff and customers. It will even provide a printout of your selected system.
